
CFZE-2GB

Compact Flash Zip Emulator

Replace the Zip cartridges on your Universal Station with reliable Compact Flash

Solid state reliability for US removable media...

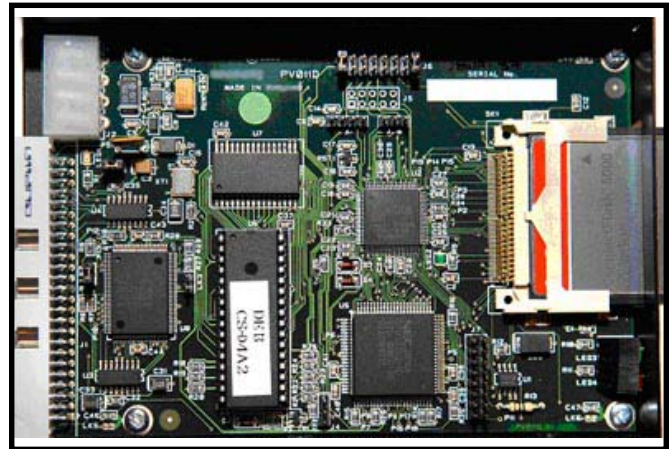

The CFZE-2GB Compact Flash Zip Emulator lets you use readily available compact flash chips in place of Zip cartridges as removable media on your Honeywell Universal Station.

A Simple, Hardware-Only Solution...

The CFZE-2GB is a direct replacement for the Zip drives on your Honeywell Universal Stations and GUS Stations. The 3.5" form factor will fit in a disk slot using the same mounting footprint as the original Zip drive. The emulator uses the same standard SCSI cable and will be seen as a SCSI Zip drive by the host computer.

Back up your entire History Module to a single chip...

The CFZE-2GB with a 2 GB industrial grade flash chip has enough capacity to back up your entire History Module drive to the single chip. The Honeywell CR or "Removable Media Initialization" command will format the entire 2GB CF chip as if it were a 2 GB Zip cartridge. *No more multiple cartridges to keep track of when backing up your History Module.*

Guaranteed...

Order a CFZE-2GB today. If for any reason you are not satisfied with the product, return it within 30 days for a full refund. Product limited warranty one year from date of shipment.

Specifications

- Board size: 3.5" Form factor – 3.75"x5.5".
- Compact Flash: Standard 3M header for Type 1 & 2 cards - device requires industrial grade, SLC recommended.
