
HMT-3000

Honeywell Mouse Translator

*Use a PS/2 Mouse on a
Universal Station!*

Your favorite PS/2 device for cursor control

The HMT-3000 connects an inexpensive off-the-shelf standard PS/2 mouse or trackball to a Honeywell Universal Station, Universal X Station, Micro TDC or Universal Workstation (UWS). On the Universal Station, this device **replaces** the touch screen for cursor control. For older stations that use Honeywell's proprietary mouse or trackball, this interface offers you a wide range of low-cost alternatives to the original Honeywell cursor control device.

The interface can be configured to provide Honeywell-type button operation (right click select) or PC-type operation (left click select).

Easy Installation

Any standard PS/2 mouse or trackball attaches to the PS/2 connector of the translator unit. Universal cable assemblies included with the HMT-3000 allow direct connection to your peripheral I/O card whether it is EPDG, PDG, TPDG, EPDGC, or TPDGC.

Specifications

Size: 10.2 cm x 4.6 cm x 3.3 cm

Color: black

Weight: 70 grams

Includes 2-button mouse with 4' cord length, and required cable to I/O card.

Warranty

One year from date of purchase, return to factory.
