# HPI-3000

## Protocol Converter

*Replace the matrix printer on your Universal Station with a standard parallel printer*

---

### Now You Can Choose the Printer for Your Honeywell Universal Station...

The HPI-3000 Protocol Converter lets you replace the Honeywell matrix printer on your Universal Station with virtually any Hewlett Packard-compatible or Epson-compatible parallel printer. Choose almost any LaserJet or DeskJet printer from HP - or any other printer compatible with HP's PCL3. Or choose any narrow or wide-carriage matrix printer compatible with Epson's MX-80. Take advantage of the low cost, high quality and reliability of today's best printers to enhance your Honeywell Universal Station.

### A Simple, Hardware-Only Solution...

The HPI-3000 connects to most Universal Stations using a standard RS232 cable (supplied with the unit). The printer connects to the other side of the interface (a 5½" x 4" x 1½" box) using a standard parallel printer cable (also supplied with the unit). Power to the HPI-3000 is supplied by a standard 9V adapter plugged in to a 110V AC outlet.

For LaserJet, DeskJet, and narrow-carriage matrix printers using 8½" x 11" or A4 size paper, all printed text uses a compressed font, to accommodate the narrower paper width. Screen prints are printed in landscape mode with these printers. Wide-carriage matrix printers are formatted like the Honeywell printer that they replace.

### Fast, Reliable, Affordable...

The protocol translation introduces absolutely minimal time delay to the printing process. The time required to generate a printout is governed by the Universal Station and the speed of the printer you choose. A complex screen print to a LaserJet IV takes 45 seconds, for example.

The HPI-3000 is based on a simple, rugged, trouble-free design that has developed a reputation for reliability in the field. The design is supported by Honeywell, and is sold in the U.S. by Honeywell as part no. 38002276-100.

At half the cost of competing printer solutions, the HPI-3000 is your most versatile, cost-effective alternative to the original matrix printer offered by the manufacturer.

### Guaranteed...

Order an HPI-3000 today. If for any reason you are not satisfied with the product, return it within 30 days for a full refund. Product limited warranty - one year.
